

SGAG

- * Astronomy Education
- * Public Star Parties & Outreach
- * Preserve Dark Skies over SW Utah

[HTTPS://SGAG.club/](https://sgag.club/)

Meetings: 7:00 pm, 2nd Tuesday of each month

Washington Branch Library, 220 N 300 E, Washington, UTAH.

Due to Covid restrictions meetings may be via zoom instead.

The St. George Astronomy Group (SGAG) was formed in November 2013. In late August of 2016 SGAG became a formal astronomy club with a 501(c)(3) tax status. We have grown from 2 members in November of 2013 to 65.

SGAG represents the greater St. George area as far distant as Kanab and north of Cedar City. We are cooperating and working with the Colorado Plateau Dark Skies Cooperative (a unit of the International Dark-Skies Association) and Ivins Dark Sky Initiative. We have worked with Quail Creek/Gunlock State Park, City of Ivins, St. George Children's Museum, Zion National Park, Cedar Breaks National Monument, Grand-Canyon Parashant National Monument, Springdale City, Tropicville City, and the city of St. George.

We have done star/solar events for church groups, scouts, schools, home school associations, and the libraries. SGAG has donated Horkheimer Library Telescopes to the WashCO library system in 2018 and 2019. SGAG is the caretaker for the 10 WashCo Library Telescopes distributed among the 8 library branches.

We are striving to make this organization fun and educational for everyone.

Reasons to Join the Formal Club

- * Shared interest and enthusiasm.
- * Public and Private Star Parties throughout the year.
- * Access to the clubs Loaner Telescopes
- * Membership in the Astronomical League & Newsletter.
- * Membership in the Night Sky Network; a NASA/JPG Project.
- * Access to Outreach Toolkits.
- * Discount on certain Astronomy Magazine subscriptions.
